

## PRODUCT SHEET

Argyle Loco Works. (Australia)

Welsh Steaming Coal

Welsh Anthracite Steaming Coal is ideal for miniature steam locomotives where low emissions are required. It is a hard, compact variety of coal that has a submetallic lustre. It has the highest carbon content, the fewest impurities, and the highest energy density. Argyle's Welsh Steaming Coal is sized to suit garden gauge models. Coal fired locomotives require special attention with respect to cleaning and servicing, consult your manufacturers handbook.

### Product Specifications

High heat output: 14,400 BTU/lb  
High Carbon: 85%  
Low Sulphur: 0.65 – 0.80%

Volatile Matter: 8 – 18%  
Grain size: 10 – 15mm  
Package size: 1kg and 2kg

Specifications are subject to update as development and production proceed and may change without notice.
