WD BALDWIN Live Steam 4-6-0T

An urgent need for narrow gauge locos to operate the lines behind the trenches in WW1 led the Railways Operating Division (ROD) to source locos from America as well as Britain. Both Baldwin and Alco produced designs and the Baldwin 4-6-0 pannier tank was made in huge numbers. The model is internally gas fired and is constructed from etched brass and stainless steel. The model is only available in manual control version. The standard colour is satin black. Versions for 32mm and 45mm gauges are available.

As the gas capacity is larger than the water capacity, a boiler top up system will be supplied. The boiler is fitted with a water gauge glass. The wheels are insulated as standard. The cab roof lifts up and tilts sideways to give easy access to the cab interior.

Product Specifications	
Scale	1:19 (16mm:1 foot)
Gauge	32mm or 45mm
Length Over Couplings	355mm
Width Over Footplate	106mm
Height to Top of Chimney	152mm
Minimum Radius	1 metre (3 feet 3 inches)
Boiler Features	Fitted water gauge glass, safety valve, pressure gauge, opening smoke box door, water filling turret in cab
Cab Controls	Steam regulator, gas regulator, lubricator with under floor drain, reverse lever
Cylinders	Piston valve, bore 1/2inch, stroke 3/4inch, piston valve type
Valve Gear	Simplified Walschaerts type with working expansion link and lever reverse from cab All stainless steel construction, black nickel plated

Models Available	
Code	Model
S19-1 WD	Baldwin for 45mm (1 gauge)
S19-2 WD	Baldwin for 32mm (0 gauge)
