

PRODUCT SHEET ACCUCRAFT TRAINS USA

West Side Lumber Heisler #3 Live Steam

The prototype was built in 1899 as the "Thomas S. Bullock" for the West Side Flume & Lumber Company. It served as a mainline and logging engine on both the WSF&L and Hetch Hetchy & Yosemite Valley Railroad. The #3 was converted to standard gauge in 1947. In 1962, the locomotive was sold to the Roaring Camp & Big Trees Railroad in Felton, California as their #2 and converted back to 3-foot gauge. The Heisler is still in operation today!

Product Specifications

Scale / Gauge	1:20.3 / 45mm
Construction	Brass & Stainless Steel
Min Radius	1.2m (4 feet)
Length	482.6mm (19 inches)
Width	147.32mm (5.8 inches)
Height	184.15mm (7.25 inches)
Features	Live steam, Butane fired, Safety valve, Pressure gauge, Water level gauge, Adjustable lubricator, Hand water pump

Models Available

Code	Model
AL87-760	Live steam, Butane fired
