Steam Powered Garden Railways

## PRODUCT SHEET

### ACCUCRAFT EUROPE

DB CLASS 45 010 2-10-2

The Class 45 engines were the most powerful steam locomotives ever operated in Germany. They were built between 1936 and 1937 by the firm of Henschel. After the first two engines entered service, a further 26 units were delivered in 1940. However, the third order for another 103 machines was cancelled in 1941, because the outbreak of the Second World War favoured the construction of simpler wartime locomotives, the so-called *Kriegslokomotiven*. The Class 45s were given the operating numbers 45 001—45 028. The vehicles were coupled with 2'3 T 38 tenders. Those with underfeed stokers had 2'3 T 29 Stoker tenders.

#### PRODUCT SPECIFICATIONS

Scale: 1:32

Gauge: 45mm

Length over Buffer: 801.4 mm

Height: 142.2 mm

Wheel Arrangement: 2-10-2

Min Diameter: 2.4M (8ft)

Boiler Type: Dual Flue

Working Pressure: 100psi

Cylinder: 3-Cylinder with D-Valve Full Working Valve Gear

Pressure gauge, Cylinder Drain Cocks, Water Level Glass, Axle Water Pump, Hand Operated Water Pump in Tender, Lubricator.

Code: DB45LS	DB Class 45 010 Live Steam
