Isle of Man 4 Wheel Coach

These are models of the 4-wheel 3rd class and 4-wheel Brake/3rd class coach as originally supplied to the Isle of Man Railway. The models feature full internal seating and glazed windows. The roof is removable if required for customers to install their own interior detail, for example, miniature people, seat covers etc. Each has four different running numbers available. An additional set of 32mm wheels is also provided. Although the models are 1:20.3 scale they look well with 1:19 scale equipment and are probably larger than the equivalent scale models of Talylyn coaches!

PRODUCT SPECIFICATIONS

Scale: 15mm to 1 foot (1:20.3)

Length over couplings: 302mm (12 inches)
