'Henry'

REGNER
Dampf- und Eisenbahntechnik

Henry is a live steam freelance locomotive based on American logging tradition. Supplied as a kit, the major assemblies (boiler, engine unit, gas tank) are prefinished leaving you to assemble the chassis, wooden body, plumbing etc. Controls include steam regulator, reverser, water level gauge, pressure gauge. Powered by a single, double acting oscillating cylinder, flywheel and a geared drive to the wheels. Wheels are insulated and are gauge adjustable. Supplied with a Roundhouse gas filler valve.

Note: Log pile, lamp, vice, axe, tools etc shown in the pictures may not be included with the model

Specifications subject to change without notice.
