Regner

**'Betsy' Kit 20795****Live Steam 0-4-0 with Tender**

This Regner kit requires no soldering, turning, milling or painting.

The boiler is heated by a single flue gas burner. Run time is approx 20 minutes without the addition of water, however the supplied Goodall valve allows water to be added while under steam thus extending the length of the run

Betsy runs on 45mm track and has insulated wheels.

Mechanical connections for RC instillation are included. (Whistle, remote control and servos are not included in the kit.)

Specifications

L x W x H 40.5 x 10 x 12.5 cm

Boiler 150ml

Piston valves (Teflon).

Includes Goodall valve and Pressure Gauge

Designed for RC use.

Specifications subject to change without notice.
