

PRODUCT SHEET
SUNSET VALLEY RAILROAD (USA)

Code 250 Brass Track

Sunset Valley Railroad offer the world's most comprehensive range of code 250 model railroad track system in 45mm and 32mm gauge. Suitable for 1:32, 1:20.3, 1:22.5 and 1:19 scales for both Garden and Indoor Railroads.

Sunset Valley brass rail is produced in Germany by a company with a reputation for high quality copper based rolled and drawn products.

It is type 360, which is 59% Copper, 3% lead, balance zinc. This is the best alloy for rail as it has good strength and corrosion resistance.

Each batch is supplied with material certifications, tensile strength and ductility data and annealing test result. It is also inspected for straightness and twist. This ensures a consistent quality year after year.

Checklist for choosing Brass Track

- Check for longitudinal twist over the full length of the rail
- Check for flatness when laid on a plain surface.
- Check that it is quality brass suitable for long exposure to the elements.
- Check for brittleness and ductility (annealing).
- Check that the ties (sleepers) are UV stabilised

Please consider the above credentials when choosing Brass Track.
